

# ROMANIA HUB EXPANSION

Embedded Software Development & Engineering Excellence

## New Romania Hub

LHP Engineering Solutions is proud to announce the opening of our newest technology hub in Bucharest, Romania. This expansion integrates Eastern Europe's premier engineering talent into our global delivery model, providing specialized support for transportation-focused embedded systems.

### For OEM's and Suppliers

LHP's New Romanian Hub is for global OEMs and Tier-1 suppliers who require access to elite embedded systems and IoT engineering talent that complements U.S.-based programs at a more cost-effective rate than traditional offshore models, without the typical quality, delivery, and management risks associated, thus ensuring dependable, on-time execution done right the first time.

### Services Offered Include:

#### FUNCTIONAL SAFETY (ISO 26262)

Leveraging deep expertise in safety-critical systems to ensure your products meet the highest ASIL certification requirements.

#### MODEL-BASED SYSTEMS ENGINEERING

Accelerating model-based systems development through simulation, auto code generation, verification, and safety-aligned implementation.

#### EMBEDDED SOFTWARE & CONTROLS

Delivering safety-critical design, development, verification, and deployment of reliable, compliant embedded systems across industries.

### WHY ROMANIA?

- Elite Engineering Talent Pool
- EU Compliance & Data Security
- Strategic Global Timezone Access
- Deep Automotive Industry Roots
